DETAILED ACTION

This office action is responsive to amendment filed on 09/19/2006.

Response to Amendment

The Examiner has acknowledged the amended claims 1 – 3, 5, 9, 13, 17 – 20, and the submission of new claims 21 and 22.

Response to Arguments

Applicant's arguments, see amendment, filed 09/19/06, with respect to the rejection(s) of claim(s) 1 – 3, 5 – 13, and 15 – 20 under 35 U.S.C. 102 (e) and 103 (a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection under 35 U.S.C. 101 non-statutory is made.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1 – 3, 5 – 9, 13, and 15 – 22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claimed invention as a whole does not accomplish a practical application. That is, it must produce a tangible result“.

The tangible requirement does not necessarily mean that a claim must either be tied to a particular machine or apparatus or must operate to change articles or materials to a different state or thing. However, the tangible requirement does require that the claim must recite more than a 35 U.S.C. 101 judicial exception, in that the process claim must set forth a practical application of that judicial exception to produce a real-world result. *Benson*, 409 U.S. at 71-72, 175 USPQ at 676-77 (invention ineligible because had “no substantial practical application.”). “[A]n application of a law of nature or mathematical formula to a ... process may well be deserving of patent protection.” *Diehr*, 450 U.S. at 187, 209 USPQ at 8 (emphasis added); see also *Corning*, 56 U.S. (15 How.) at 268, 14 L.Ed. 683 (“It is for the discovery or invention of some practical method or means of producing a beneficial result or effect, that a patent is granted . . .”). In other words, the opposite meaning of “tangible” is “abstract.”

In this case, claims 1, 9, and 17 are directed to an “abstract idea” because they do not represent a practical application of the idea. Such claims are lacking **“tangible results”** because **the added limitation of “wherein each of the first and second test execution requests includes commands specifically programmed to initiate a number of functional aspects of a software product to be tested”** does not provide tangible result to the claimed. The claims as a whole are “data structure”, which is a physical or logical relationship among data element, designed to support specific data manipulation functions. There are no tangible results being produced. Therefore, claims 1, 9, and 17 are non-statutory.

Claims 2 – 3, 5 – 8, 13, 15 – 16, and 18 – 22 are necessarily rejected as being dependent upon the rejection of claims 1, 9, and 17.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
